Barton to Hear Great Arctic Explorer

Donald MacMillan, the great Arctic explorer, who made the famous trip to the north pole with Peary, is to appear in Barton at the Gem theatre under the auspices of the academy on Monday evening, January 19.

Dr. MacMillan comes here from an engagement at Dartmouth college. He carries motion picture films taken in the far North and many wonderful lantern slides.

This lecture is an unusually interesting one, both as to the material and the character of the pictures shown. Much surprising information is given as to the summer conditions in the Arctic—plant life, bird life, the home and everyday life of the Eskimo, animal life, etc.—all are shown by unusual slides on these subjects.

This is one of the greatest instructive entertainments given in Barton in years. Needless to say, the expenses of the lecture are heavy and the cooperation of all Barton organizations is necessary to make ends meet. Arrangements have been completed to get the great lecturer here only after much difficulty owing to the large fee usually received by him.

Due to a special agreement reached, it will be possible to finance the venture if a good response is received in the sale of tickets. The adult admission is 55 cents, including war tax. Students of the academy will make a house to house sale of tickets and special precautions will be taken to avoid more than one caller at a home.
